

"pdfDocs Desktop gives us all the tools we need to manage and share information; integrates with our DM; and costs less than Acrobat. The decision to switch was an easy one"

*Cassandra Sylvest,
Hummingbird DM
Administrator McGlinchey
Stafford*

"DocsCorp's excellent products and tight integration has helped our firm move forward in an increasingly PDF-centric world"

*Peter B. Flack
Application Specialist
Ballard Spahr*

"I recommend it as a good Adobe Acrobat alternative. After using it to edit multiple PDFs as one file, I now see the beauty of the implementation."

*Law Office Computing
Review: Richard C. Belthoff
Jr., vice president and
assistant general counsel at
Wachovia Corp.*

Powerful alternatives for your firm

The pdfDocs Solutions Suite is a powerful integrated group of products designed for legal firms. More and more firms are finding out and realising real improvements in:

- Streamlining of business processes
- Increased collaboration between users
- Enhanced workflows with document management systems and;
- Risk and cost reduction
- Supports legal compliance to statutes and standards

Legal appeal

The pdfDocs solution suite gives legal professionals complete control over the assembly, distribution and comparison of paper and electronic documents and forms. Some of the key features of the suite include:

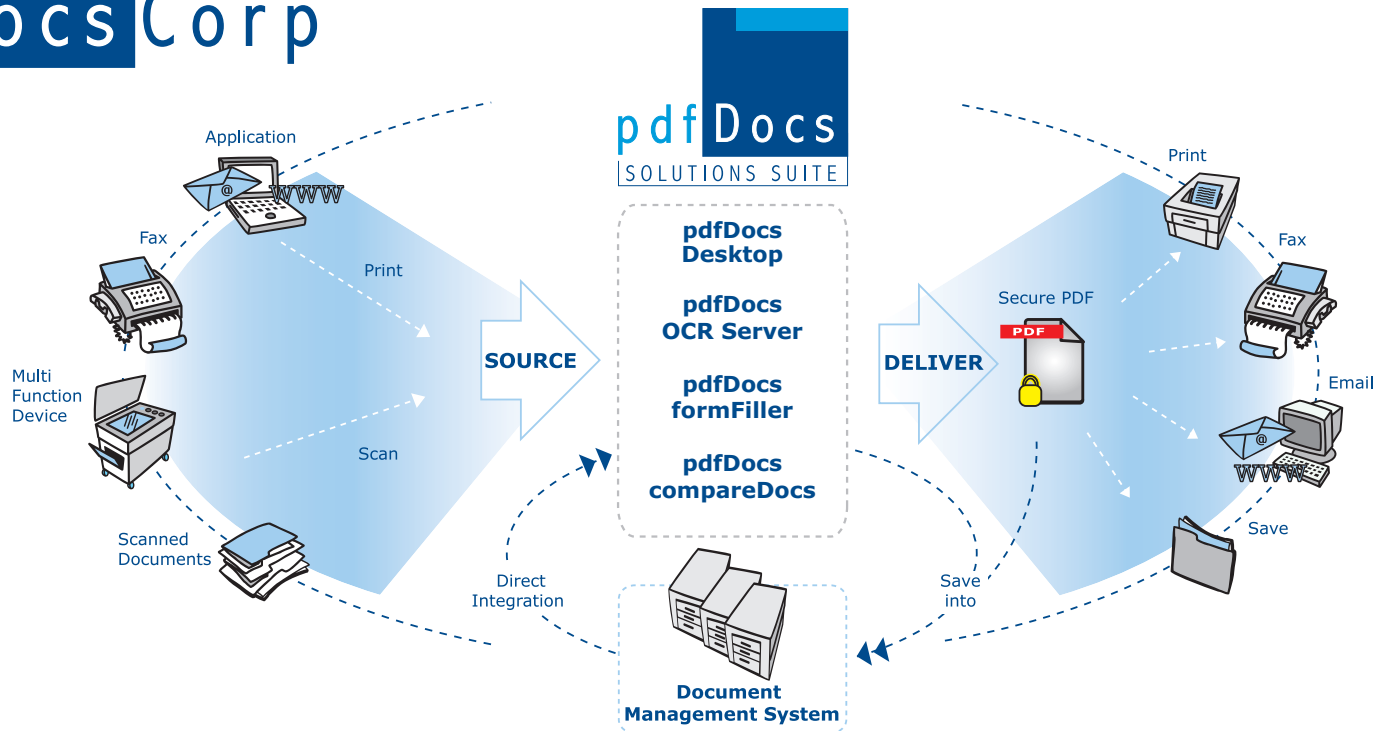

- PDF creation and collation
- PDF annotation and redaction
- Document comparison
- Secure email conversion
- PDF form filling
- Optical character recognition
- Digital signatures
- Document management system integration

Integration – enhance your existing investment

The pdfDocs Solutions Suite has been designed to enhance your existing investment in document management. With complete desktop integration with Hummingbird DM, OpenText Livelink ECM - eDOCS and DOCS Open, Interwoven WorkSite, TRIM Context and WORLDOX; your users will have enhanced productivity through improved document workflows.

Users can profile and save external documents and instantly render existing documents in the document management system into PDF format. Additional functionality enables users to email as PDF, create related documents and to create a PDF version direct from the document management system.

The pdfDocs solutions suite

pdfDocs Desktop

- Enables users to easily create PDFs, combining output from different programs and scanned images; then organise, annotate and arrange as PDF for electronic storage or distribution
- Automates the capture of scanned images for routing as PDF to user desktops and DMS systems
- Insert form fields into the PDF document to capture data and information
- Includes unique redaction tool, ensuring secure and complete removal of confidential text from the document
- Automatically split PDF files based on file size or page number to comply with electronic filing requirements
- Integrates with Interwoven, Trim, Open Text and Worldox document management systems

pdfDocs formFiller

- Fill in, edit, save and digitally sign a PDF form
- Save forms "as is" or "flattened" to ensure that the data is always associated with the form
- Handles rights-enabled forms
- Integrates with Interwoven, Trim, Open Text and Worldox document management systems

pdfDocs compareDocs

- Compare any two documents and highlight differences between them
- PDF-to-PDF, Word-to-Word, Word-to-PDF or PDF-to-anything comparison
- Accept/reject changes natively in MS Word using Track Changes
- Run multiple, independent comparisons
- Integrates with Interwoven, Trim, Open Text and Worldox document management systems

pdfDocs OCR Server

- Creates text-searchable PDFs from scanned or existing document images, for quick conversion into Word documents
- Used in conjunction with pdfDocs Desktop, the OCR Server provides OCR capability direct to all DMS users
- Integrates into document and records management systems
- Multi-processing technology (MPT) lets users process multiple OCR jobs concurrently
- Integrates with Interwoven, Trim, Open Text and Worldox document management systems
